

AMENDMENTS TO THE SPECIFICATION:

Please amend the paragraph at page 5, lines 15-27 to read as follows:

Figure 1 is a diagrammatical cross-sectional view of a needle injecting a small article, such as a cell;

Figure 2 shows diagrammatic views of a cell approaching, impinging and being removed from a needle;

~~Figure~~ Figures 3 and 4 are diagrammatical representations of an injection system, enabling ~~automatic~~ automatic delivery and removal of a cell;

Figure 5 is a diagrammatical view of an alternative arrangement for a cell injector;

Figure 6 is a diagrammatical view of a cell injector device having a number of cell injector units run in parallel;

Figure 7 is a diagrammatical view of a needle housing;

Figure 8 is a diagrammatical view of an injection device showing the needle and housing;

Figure 9 is a photograph taken through an electron microscope of a cell injector needle; and

~~Figure~~ Figures 10 to 16 show methods to produce the devices; and

Figure 17 is a close-up picture of an injection device as shown diagrammatically as item 104 in Figure 16.
